Quarterly Bulletin No. 95, January 1, 1967

QUARTERLY BULLETIN
POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

LOS ANGELES COUNTY POPULATION

January 1, 1967 7,032,938

Commission estimates indicate that the population of Los Angeles County reached 7,032,938 on January 1, 1967. Represented in this new total is an increase of 17,434 during the fourth quarter, a gain of 78,588 for 1966 and a total growth of 900,238 persons since the 1960 Census .

During 1966, the population within the County's seventy-six cities increased 88,599 to reach a January first total of 5,934,432. The population within the unincorporated area during the same period declined by 10,011 falling back to a total of 1,098,506 which is just slightly larger than the 1960 Census count of 1,096,250.

The population ranking of the County's ten largest cities remained unchanged except for an exchange of places by Inglewood and Santa Monica. Inglewood drew slightly ahead of Santa Monica during the fourth quarter to assume a ranking of ninth place. The ten largest cities on January first were:

1. Los Angeles 2,796,220; 2. Long Beach 377,017; 3. Torrance 139,414; 4. Glendale 136,620; 5. Pasadena 125,509; 6. Burbank 97,646; 7. Downey 96,999; 8. Norwalk 94,859; 9. Inglewood 89,414; and 10. Santa Monica 89,215.

AN EXPANDED FORMAT

This issue's expanded format is an attempt to meet two recognized needs, 1. a more readable Statistical Areas map, and 2. a means to provide current information on Commission activities which would be of interest to Bulletin readers.

The double page map will be a regular feature and the *Supplement* an occasional additional page.

THE REGIONAL PLANNING COMMISSION OF LOS ANGELES COUNTY *Commissioners: Mrs. L. S. Baca, Chairman; Louis Kanaster, Vice Chairman; Alson E. Abernethy, Arthur J. Baum, and Owen H. Lewis; Director: Milton Breivogel.*

For Additional Information: *Call or write the Population Research Section, Los Angeles County Regional Planning Commission, 320 West Temple Street, Los Angeles 90012, MAdison 8-9211, Extension 63032.*

60,000 DWELLING UNITS DEMOLISHED SINCE 1959

Questions concerning dwelling unit demolitions by those involved in the problems of housing supply and demand have increased as residential construction has declined. In response to this interest, the Commission undertook a review of Los Angeles County residential demolitions for the years 1960 through 1966.

Just completed, this study revealed that in these seven years a total of 60,387 dwelling units were demolished. During this same period, building applications were issued for 484,099 new dwelling units. Thus for each eight dwelling units authorized one was destroyed.

The annual number of dwelling units demolished ranged from a low of 5,143 units in 1960 to a high of 11,730 units in 1963 with the average annual number for the seven years totalling 8,627 units.

Geographically, the majority of residential demolitions have occurred in the larger and older cities of the County. Each year demolitions reported by Los Angeles City have far exceeded those of any other jurisdiction. Long Beach has been a distant second during the past three years with Santa Monica holding that position for three of the four years previous to 1964.

These residential demolition statistics have been compiled from the official reports of each of the permit issuing agencies in Los Angeles County.

Unfortunately, residential demolitions are not as carefully reported by some of these agencies as are applications for new construction. Although the number of structures is shown, often the same care is not extended to reporting the number of dwelling units involved.

QUARTERLY BULLETIN
SUPPLEMENT
THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

FORTY-SIX THOUSAND ACRES IN LOS ANGELES COUNTY INDUSTRIAL LAND RESERVE

Los Angeles County has 46,422 acres zoned or planned for industrial use which are now vacant or devoted to agriculture. These lands comprise the County's basic industrial land reserve. A recently completed survey by the Commission's Economic Studies Section disclosed that this reserve constituted 38.7% of the total of 120,098 acres zoned for industry in Los Angeles County on April 1, 1966.

A geographic distribution of the industrial land reserve by Study Area revealed that 82% of the reserve is located within four of the ten Study Areas. Forty-six per cent of the total vacant industrial land in the County is located within three coastal Los Angeles County Study Areas — East San Gabriel Valley, Southwest, and San Fernando Valley. Together they contain over three-fourths of coastal Los Angeles County's 27,800-acre industrial land reserve. The vacant industrial acreage in the North County Study Area comprises 36% of the County's total unused industrial land. These 16,621 acres can be considered Los Angeles County's long-range industrial land reserve.

Los Angeles City with 24,447 acres ranks first in industrially zoned land among the 76 cities of the County. Industry City's 4,601 acres ranks first in vacant available industrial land and contains almost half of the industrial reserve of the East San Gabriel Valley. Among cities with at least 1,000 acres of industrially zoned land, Industry City has the most land still available for development (78%), while Burbank and Vernon have the least (2%). The unincorporated territory of the County contains only 30% of the industrially zoned land, yet has 50% of the industrial reserve.

TEN STUDY AREAS

TRENDS IN INDUSTRIAL LAND ABSORPTION

Between April 1, 1960 and 1966 an estimated 10,300 acres of land were absorbed into industrial use (manufacturing, wholesaling and warehousing) in Los Angeles County. This is an average of about 1,717 acres per year. The major share of this average annual absorption, 1,685 acres per year, occurred in coastal Los Angeles County. However, industrial land development is now taking place, for the most part, away from the central core with 77% of the County's industrial development occurring at least 10 miles from the Los Angeles Civic Center.

The Southwest Study Area in the past six years absorbed into industry an average of 526 acres per year. This was a greater average annual absorption rate than that of any other Study Area. The East Central, East San Gabriel Valley, San Fernando Valley, and Southeast Study Areas also experienced substantial industrial land absorption rates during this period.

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

Bulletin No. 95 Adjustments

Two large annexations completed during the quarter involved the transfer of 1,120 dwelling units from S. A. 8.31 to S. A. 8.2 (Lynwood City) and 521 dwelling units from S. A. 22.1 to S. A. 22.11 (Part of Lakewood City). Also transferred by annexation during this period were 173 dwelling units from S.A. 7:521 to S. A. 7.3 (Part of West Covina City) and 95 dwelling units from S. A. 25.43 to 25.1 (Pomona City).

An additional 260 dwelling units were removed from S. A. 9.12 (Part of Los Angeles City) as the result of a field survey of the Bunker Hill redevelopment area. This virtually completes residential demolitions in this area.

60,000 DWELLING UNITS DEMOLISHED

(Continued from first page)

Local building department records generally understate the number of dwelling units demolished, inasmuch as Federal and State agencies are not required to follow normal permit procedures. The major source of such non-permit activity in Los Angeles County are the various freeway projects of the California Division of Highways. However, a review of the Division's available demolition records did not disclose a substantial number of dwelling units involved.

A brief summary of this study is being prepared. Those interested in a copy should call or write the Commission's Population Research Section.

QUARTERLY BULLETIN
POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

LOS ANGELES COUNTY POPULATION

April 1, 1967 estimate 7,044,711

Commission studies indicate that the population of Los Angeles County rose to an estimated total of 7,044,711 on April 1, 1967. In the seven years which have passed since the 1960 Census, Los Angeles County has experienced a population gain of slightly more than one million persons or an increase of 16.6%. This represents a seven year average annual gain of approximately 143,000 and an average increase of 392 persons a day.

During the same years the population of Los Angeles City increased an estimated 325,074 or 13.1% reaching an April first total of 2,806,669. Other cities showing large seven year population increases were: El Monte 49,404 (375.3%), Whittier 38,537 (114.5%), Long Beach 34,324 (10.0%), Torrance 30,925 (30.6%), Inglewood 26,146 (41.2%), Lakewood 19,580 (29.2%), Pomona 17,494 (26.0%), Glendale 17,492 (14.6%) and Rosemead 17,030 (110.0%). However, it must be pointed out that a substantial portion of the gains within El Monte, Whittier, Inglewood, Lakewood, and Rosemead were the result of major inhabited annexations.

Two changes were made in the relative population ranking of the County's ten largest cities. Glendale resumed third place when the results of a special census revealed that the persons per household assumed in the Torrance estimates were too high. Also returning a a previously held position, Santa Monica resumed ninth place displacing Inglewood which had the position in the January estimates.

The ten largest cities in Los Angeles County on April first were as follows: 1. Los Angeles 2,806,669; 2. Long Beach 378,492; 3. Glendale 136,934; 4. Torrance 131,916; 5. Pasadena 125,544; 6. Burbank 97,625; 7. Downey 97,065; 8. Norwalk 95,115; 9. Santa Monica 90,108; and 10. Inglewood 89,536.

THE REGIONAL PLANNING COMMISSION OF LOS ANGELES COUNTY *Commissioners: Mrs. L. S. Baca, Chairman; Louis Kanaster, Vice Chairman; Arthur J. Baum; Owen H. Lewis and Alfred A. Paonessa; Director: Milton Breivogel.*

MULTIPLE AND DUPLEX DWELLING UNITS PREDOMINANT HOUSING TYPE IN 11 CITIES

Multiple and duplex dwelling units together comprised fifty percent or more of the April 1, 1967 estimated housing inventory in eleven of the seventy-six cities in Los Angeles County. Included among these eleven cities were: Avalon, Beverly Hills, Cudahy, Glendale, Huntington Park, Inglewood, Long Beach, Los Angeles, Santa Monica, Signal Hill and South Pasadena. In only two of these cities, Santa Monica and Beverly Hills, did multiple dwelling units represent the predominant housing type. Approximately sixty percent of the total dwelling units in Santa Monica were in multiple structures while in Beverly Hills they accounted for fifty-five percent.

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

Bulletin No. 96 Adjustments

Close observers undoubtedly have noted the low Los Angeles County quarterly population increase shown in this and the past several issues. These reflect a downward adjustment in current estimated increases so as to compensate for past estimates which later information has indicated were too high.

Other adjustments in this issue include the following: transfer by annexation of 1,024 dwelling units from S. A. 12.21 to S. A. 12.1 (El Monte City); annexation of 68 dwelling units to S. A. 17.4 (Part of Lakewood City) from S. A. 17.32; and a 175 dwelling unit reduction in the housing inventory of S. A. 18.6 (Duarte City) to recognize clearing for a freeway.

Downward population adjustments were also made to reflect special censuses taken in S. A. 16.4 and 23.2 (Torrance City) and S. A. 16.3 (Hawthorne City). A reduction for a similar reason made in the population of S. A. 28.2 (Monterey Park City) in the previous quarter unfortunately was omitted from the adjustment comments in Bulletin No. 95.

Multiple and Duplex Dwelling Units Predominant Housing Type in Eleven Cities

(Continued from first page)

Although duplex dwelling units total only eight percent of all dwelling units in the County, they are a significant housing type in many cities. In five cities duplex dwelling units comprise more than fifteen percent of total housing supply. These include: Avalon 25%, Hermosa Beach 22%, Bell Gardens 20%, Cudahy 17% and Huntington Park 16%.

In addition to the listing by city shown on this page, a dwelling unit type inventory by Major Statistical Area also has been prepared and is available, without charge, to those who call or write the Population Research Section.

QUARTERLY BULLETIN
SUPPLEMENT

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

A QUARTER OF A CENTURY

1942 — 1967

May 1967 marks the twenty-fifth anniversary of the first publication of the Quarterly Bulletin. Begun in the initial months of World War II, the first three issues were published concurrently in May 1942.

In the quarter century of the Bulletin's publication, the population of Los Angeles County increased from an April 1, 1942 total of 3,081,083 to the current April estimate of 7,044,711. This is a gain of 129%. In these same years the County's housing inventory rose from an April 1942 total of 1,044,190 dwelling units to a present unit figure of 2,531,243. Included in these figures was the net addition of approximately 847,000 single, 105,000 duplex and 537,000 multiple dwelling units.

HOW IT ALL BEGAN

The Los Angeles County Major Statistical Area system was developed at a time when a program was underway for the creation of a county-wide census tract plan and an inventory was being compiled of land uses within the 1,200 square miles of the County's coastal plain.

The 115 census tracts into which Los Angeles City had been divided for the 1930 Census had proved so useful that in 1936 the Commission in conjunction with the Research Committee of the Los Angeles Chamber of Commerce and others began working on the creation of a census tract plan for all of Los Angeles County. These efforts resulted in a Bureau of the Census approved plan of 590 census tracts. These were used in reporting the 1940 Census. Revision of this original plan subsequently increased the number of Los Angeles County census tracts to 793 in 1950 and 1,297 in 1960. Pending recommendations provide for a total of approximately 1,550 tracts in 1970.

These Major Statistical Areas were first used to report the results of the 1936-1940 land use survey. At that time thirty in number, they covered only the coastal plain. However, after the 1940 Census additional areas were added so that the system would encompass the entire county. This is essentially the Major Statistical Area system in use today.

Three criteria were used in establishing the thirty-five Major Statistical Areas. In order to qualify an area had to have: 1. a readily identifiable degree of geographic separateness; 2. comprise a generally recognized local trading area; and 3. evidence through expressions in the local press, or by public or private organizations in the area, of a common community of interest. Although there has been some minor adjustment in their boundaries in the almost thirty years since they were created, the Major Statistical Areas, by and large, still represent meaningful socio-economic divisions of Los Angeles County.

The geopraphic simplicity of the early reporting system is clearly shown in the Statistical Areas map from the first Bulletin reprinted on page two. At that time a total of 93 major and sub-statistical areas were used to report both the 2,575,900 persons resident within the county's then 45 cities and the 505,183 living in the unincorporated area. Thirty-one subsequent municipal incorporations and several hundred annexations have added complexity so that today a total of 204 statistical areas are employed.

Many "unusual" events have complicated the Commission's efforts to prepare these population and dwelling units estimates. An early example is found in the commentary in Bulletin No. 3. The problem which beset the staff in those troubles times was the measurement of the impact of the recently ordered evacuation from Los Angeles County of approximately 37,000 residents of Japanese ancestry. Subsequent natural and man-made events such as mountain fires, floods, freeway construction, and the suburban building boom have each contributed a complication to the problem of estimating the dynamic population changes which have occurred in Los Angeles County.

QUARTERLY BULLETIN

POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

LOS ANGELES COUNTY POPULATION

July 1, 1967 estimate 7,057,720

The Commission estimates that Los Angeles County reached a mid-year population of 7,057,720. This is an increase of 13,000 during the second quarter and a gain of 24,782 since the beginning of the year.

The population of the County's seventy-six cities totaled 5,958,147 on July first, a gain of 23,715 since the first of the year. The number of residents within the unincorporated area increased 1,067 during the past six months to reach a mid-year total of 1,099,573. This gain would have been considerably more, but for several large annexations during the period.

The relative ranking of the County's ten largest cities remained unchanged. Their July first population was as follows: 1. Los Angeles 2,812,858, 2. Long Beach 378,528, 3. Glendale 137,048, 4. Torrance 131,981, 5. Pasadena 125,544, 6. Burbank 97,243, 7. Downey 97,074, 8. Norwalk 95,384, 9. Santa Monica 90,124, and 10. Inglewood 89,450.

DIRECTOR TO RETIRE

Milton Breivogel, Director of the Los Angeles County Regional Planning Commission will retire on September 30, 1967. Head of the Commission's staff for fourteen years, his previous service included over twelve years with the Los Angeles City Planning Department as Principal City Planner and assistant to the Director, the late Charles B. Bennett.

Before coming to California in 1941, Mr. Breivogel held planning positions both in Milwaukee and Racine, Wisconsin.

A University of Wisconsin graduate in civil engineering, he was presented in 1962 the Clarence Dykstra Award for distinguished achievement in public administration by the Los Angeles Metropolitan Chapter of the American Society for Public Administration.

Past President of the California County Planning Directors Association and a member of the Board of Directors of the National County Planning Directors Association, he was recently elected to the National Board of Governors of the American Institute of Planners.

THE REGIONAL PLANNING COMMISSION OF LOS ANGELES COUNTY *Commissioners: Mrs. L. S. Baca, Chairman; Louis Kanaster, Vice Chairman; Arthur J. Baum; Owen H. Lewis and Alfred A. Paonessa; Director: Milton Breivogel.*

For Additional Information: *Call or write the Population Research Section, Los Angeles County Regional Planning Commission, 320 West Temple Street, Los Angeles 90012, MAdison 8-9211, Extension 63032.*

University of California

NET DWELLING UNITS ADDED DECLINE TO NEW LOW

Net additions to the housing inventory during the second quarter totaled 1,970 dwelling units. This is 1,376 fewer units than were added in the previous quarter, 4,784 units less than the net increase for the same quarter a year ago and the smallest net total dwelling unit increase for a single quarter since World War II.

Multiple dwelling units comprised 78% of net units added during the past quarter. This follows a pattern that began to be evident in the late months of 1957 and which has continued unbroken, except for a brief period in 1960 when single dwelling units pulled slightly ahead.

POPULATION AND DWELLING UNITS

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

ADJUSTMENTS

Two substantial adjustments were completed during the quarter. The first of these involved the removal of 146 dwelling units from S.A. 4.1 (Burbank City) so as to recognize house trailers removed since the 1960 Census.

Secondly, 1,612 units were transferred from S.A. 28.65 (unincorporated) to S.A. 28.7 (Part of Rosemead City) as the result of an annexation election.

(p) provisional

* Births per 1,000 population on July 1, except for 1950 and 1960 when date was April 1, (Excludes Armed Forces abroad except in 1946).

** Refers only to births and deaths occurring within the United States. Alaska included beginning 1959 and Hawaii, 1960.

DECLINE IN NET NATURAL INCREASE CONTINUES

Provisional reports show that declining births and increasing deaths combined during the past year to provide Los Angeles County with a 1966 net natural increase of approximately 67,000. This is the lowest annual surplus of births over deaths since 1953

Currently available vital records disclosed that 127,603 live births occurred in Los Angeles County during 1966. This gives the County a tentative birth rate of 18.2 births per 1,000 population for the past year as compared with a rate of 19.0 in 1965 and 24.8 in the peak year of 1957.

The Public Health Service in a recently released provisional statement announced that births in the United States in 1966 totaled 3,629,000, the smallest number since 1950. This total represents 138,000 fewer births than in 1965 or a decline of 3.6%. Births in Los Angeles County fell 2.3% during the same period.

SUPPLEMENT

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

A REGIONAL RECREATION AREAS PLAN FOR LOS ANGELES COUNTY

Recently published, the Regional Recreation Areas Plan disclosed that Los Angeles County has a current deficiency of 13,000 acres of developed recreation land for "day use". This 128-page survey also points out that an additional 18,000 acres will be needed to meet the "day use" demands anticipated by 1985. The report inventoried 264 existing or developing regional recreation areas, but advises that the acquisition and development of 206 additional sites will be necessary in the next twenty years to accommodate anticipated population increases.

THE ESSENCE OF THE PLAN — 1985 GOALS

Regional Park (existing: 22 sites) ..... 61 sites
(large general use multipurpose parks)

Recreation Parks (existing: 11 sites) ..... 41 sites
(large scale active sports facilities)

Reservations (existing: 41,489 acres) ..... 122,790 acres
(readily accessible natural lands)

Scenic Drives ..... 700 miles
(260 miles in national forests)

Specialized Facilities (existing: 135 sites) ..... 286 sites
(a wide variety of specific single recreation experience areas and facilities)

The Master Plan of Parks, as adopted by the Regional Planning Commission in 1948 gave recognition to the need for planning for regional parks. By 1958 planning for regional sites for the whole of Los Angeles County had matured to the point of preparing a plan exclusively regional in character. On January 20, 1959 the Los Angeles County Board of Supervisors adopted the Regional Recreation Areas Plan as a unit of the Recreation Element of the General Plan for Los Angeles County.

This 1959 plan was the first truly comprehensive recreation plan for the County, covering the whole of the geographic area of the county, defining and setting standards, describing and identifying specific areas and facilities, and proposing future acquisitions—all based on the projected 1975 population of the county. The plan covered a wide range and variety of regional recreation activities and areas. It also reflected a recognition of the diversity of population distribution and concentration both as to geography and age.

This "new" plan adopted by the Board of Supervisors on July 29, 1965 is a reassessment and amendment of the original 1959 plan. It reaffirms the original objectives, but is more comprehensive in that the total number of areas identified has more than doubled and a wider range of sites and facilities having regional significance has been included.

TABLE I

REGIONAL RECREATION AREAS
LOS ANGELES COUNTY
1965 — 1985

Classifications	Existing	Developing	Proposed	Total
Regional Parks	22	22	17	61
Recreation Parks	11	7	23	41
Reservations	8	3	28	39
Scenic Drives	12	0	31	43
Specialized Facilities	135	44	107	286
	188	76	206	470

Agencies at all levels of government, federal, state and local, concerned with providing regional recreation facilities, participated in this review refining the criteria for placing areas on the plan and suggesting additional sites. This review resulted in many areas being added, particularly within the Angeles National Forest.

The 470 regional recreational areas recognized in the plan have been grouped into five major classes. These categories include: 1. Regional parks or large multipurpose parks which attract people of all ages, and interests; 2. Recreation parks or large scale active sports facilities; 3. Reservations or lands set aside so as to preserve significant natural phenomenon; 4. Scenic drives or roads or highways which provide an opportunity for visual enjoyment of nature, and 5. Specialized facilities or single purpose activity areas possessing regional significance.

TABLE II

REGIONAL RECREATION AREAS
PROPOSED LAND AQUISITIONS

(In Acres)

Use	Privately Owned	Publicly Owned but not committed to recreation	Total
Day Use Areas	23,522	4,688	28,210
Overnight Use and Wilderness	802	6,679	7,481
Natural Resource Reservations	27,393	11,638	39,031 a.
Historic Sites and Monuments	8		
Total Acres	51,725	23,005	74,730

a. An additional 35,780 acres which will not require public acquisition are proposed for natural reservations.

The primary focus of the plan has been directed toward the development of recreation areas close to centers of population within the urban or urbanizing sectors and secondarily to the rural or open areas of the county.

While the opportunities for establishing regional recreation areas within Los Angeles County are numerous and varied, actual site acquisitions have become increasingly difficult as rapid urbanization has continued. The need for recreation lands tends to increase in proportion to population growth. However, the cost of such land generally has been increasing even more rapidly resulting in an ever more difficult problem of land acquisition.

TABLE III

REGIONAL RECREATION AREAS
Major Service Groupings*

Areas	Existing Number	Existing Acres	Developing Number	Developing Acres	Proposed Number	Proposed Acres
Day Use	137	28,251	41	18,480	127	28,210
Overnight Use & Wilderness Experience	29	6,513	8	41,489	52	7,481
Natural Resource Reservations	8	41,489	4	6,490	27	74,811
Historical Sites & Monuments	20	79	1	23	5	8

*Grouped according to the expected dominant recreational experience available on the site. Some sites include more than one such service group.

Although primarily the concern of the County of Los Angeles, other public agencies at all levels of government share in the responsibilities for acquisition, development, operation and maintenance of these facilities.

The plan, in addition to delineating these problems, recommends an accelerated program of acquisition by the agencies who are now or will be involved with these recreational areas in the future.

Copies of the Regional Recreation Area Plan are available for reference in the Commission's offices and in most public and college libraries throughout Los Angeles County. Upon written request, copies will be sent to interested libraries, public agencies or other service groups.

QUARTERLY BULLETIN
JAN 10 1968

POPULATION AND DWELLING UNITS

THE REGIONAL PLANNING COMMISSION • COUNTY OF LOS ANGELES, CALIFORNIA

LOS ANGELES COUNTY POPULATION

October 1, 1967 estimate 7,073,030

The Commission estimates that on October first the population of Los Angeles County totaled 7,073,030. This is an increase of 15,310 during the third quarter and 40,092 since the beginning of the year.

In the seven and one-half years since the 1960 census, Los Angeles County population has increased 1,030,330 or approximately 1.7 per cent a year. This is an average gain of 376 persons a day during this period.

Growth in Los Angeles City accounted for 38.1 per cent of the County's third quarter increase showing a gain of 5,834 and an October first population of 2,818,692.

The population of the remaining seventy-five cities rose to 3,152,423 on October first. This is a gain of 14,211 since the beginning of the year. Residents in the unincorporated area totaled 1,101,915 at the end of the third quarter.

DWELLING UNITS ADDED IN SLIGHT REBOUND

Net additions to the housing inventory rebounded slightly during the third quarter with 3,147 dwelling units being added as compared to 1,970 units in the previous three months. A major contribution to this very modest upturn was the addition of 678 more single family dwelling units than in the second quarter. However, the current third quarter net additions totaled 1,479 fewer units than were added in the same quarter of last year.

An even darker picture is presented by a review of this year's nine month record. Since the beginning of the year, 11,352 fewer dwelling units had been added by October first than in the same period of 1966. This is a decline of 57.3%.

A survey of 1967 demolitions revealed that 5,412 dwelling units were demolished during the past nine months. These were distributed as follows: first quarter, 1811 units; second quarter, 1792 units; and third quarter, 1809 units. If this trend continues, approximately 7,200 dwelling units will have been removed by the close of the year.

THE REGIONAL PLANNING COMMISSION OF LOS ANGELES COUNTY *Commissioners: Mrs. L. S. Baca, Chairman; Louis Kanaster, Vice Chairman; Arthur J. Baum; Owen H. Lewis and Alfred A. Paonessa; Director: O. K. Christenson.*

*These figures are compiled from a monthly survey of residential new construction, move-ins, removals, demolitions and alterations reported by each of the permit issuing agencies in Los Angeles County. Unit changes are entered in the estimated housing inventory after either actual or assumed completion.

**These totals include additional adjustments not reported in the regular building permit review.

NEW DIRECTOR APPOINTED

Orville K. Christenson was appointed Director of the Los Angeles County Regional Planning Commission on October 3, 1967. He succeeds Milton Breivogel who retired after fourteen years as Director.

A graduate of Iowa State University, Mr. Christenson joined the Commission's staff in 1941 after employment with the California Division of Highways.

During his twenty-six years of service with the Commission he has been associated with all phases of planning including several years as Chief of the Plan Administration Division and most recently as Chief Deputy Director.

* Cudahy (SA 32.10) and Bell Gardens (SA 32.11) were incorporated after April 1, 1960. However, the boundaries of each coincides with those used in the 1960 Census. The census figures are shown in parentheses and are not included in total for SA 32.0.

ADJUSTMENTS

Two large annexations have been recognized in this issue. They include the transfer of 141 dwelling units to S.A. 22.10 (Hawaiian Gardens City) from S.A. 22.1 and 475 dwelling units to S.A. 12.1 (El Monte City) from S.A. 12.21.

A field count by the Commission's staff in the Palos Verdes Peninsula resulted in the following adjustments: the removal of 363 units from S.A. 23.311 and the addition of 64 units to 23.312.

CENTER OF POPULATION[1]

LOS ANGELES COUNTY

April 1960 — Venice and Broadway
April 1950 — Fifteenth and Figueroa Streets
April 1940 — Eleventh and Hill Streets
April 1930 — Eleventh and Hill Streets

SOUTH COUNTY[2]

April 1960 — Eighteenth and Hill Streets
April 1958 — Broadway and Venice Boulevard
April 1954 — Fourteenth and Main Streets

[1] These centers were determined by the median method. This requires the division of the total population into equal north-south and east-west segments. The point at which these two lines of division intersect is the median center.

[2] Excludes Statistical Area 20.0, North County.
